The future of digital identity

Have you ever thought about how digital citizenship could look like?

What will change for individuals and organisations if a country decides to make a leap from countless user accounts to self-sovereign identity technology?

Start experience

Set up your identity

Now it's time to create your own identity.

- 1. Open the SmartWallet.
- 2. Follow the installation guide.

My identity

All claims

Documents

Name
+ add

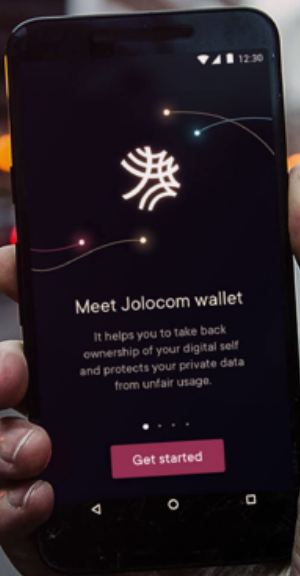

Date of birth
+ add

Prepare for arrival

In Avalon, this new identity system lets everyone access services of urban infrastructure. Wether you are visiting or relocating for good - a digital identity is the key to this country.

To install the [SmartWallet](#), please scan the QR code:

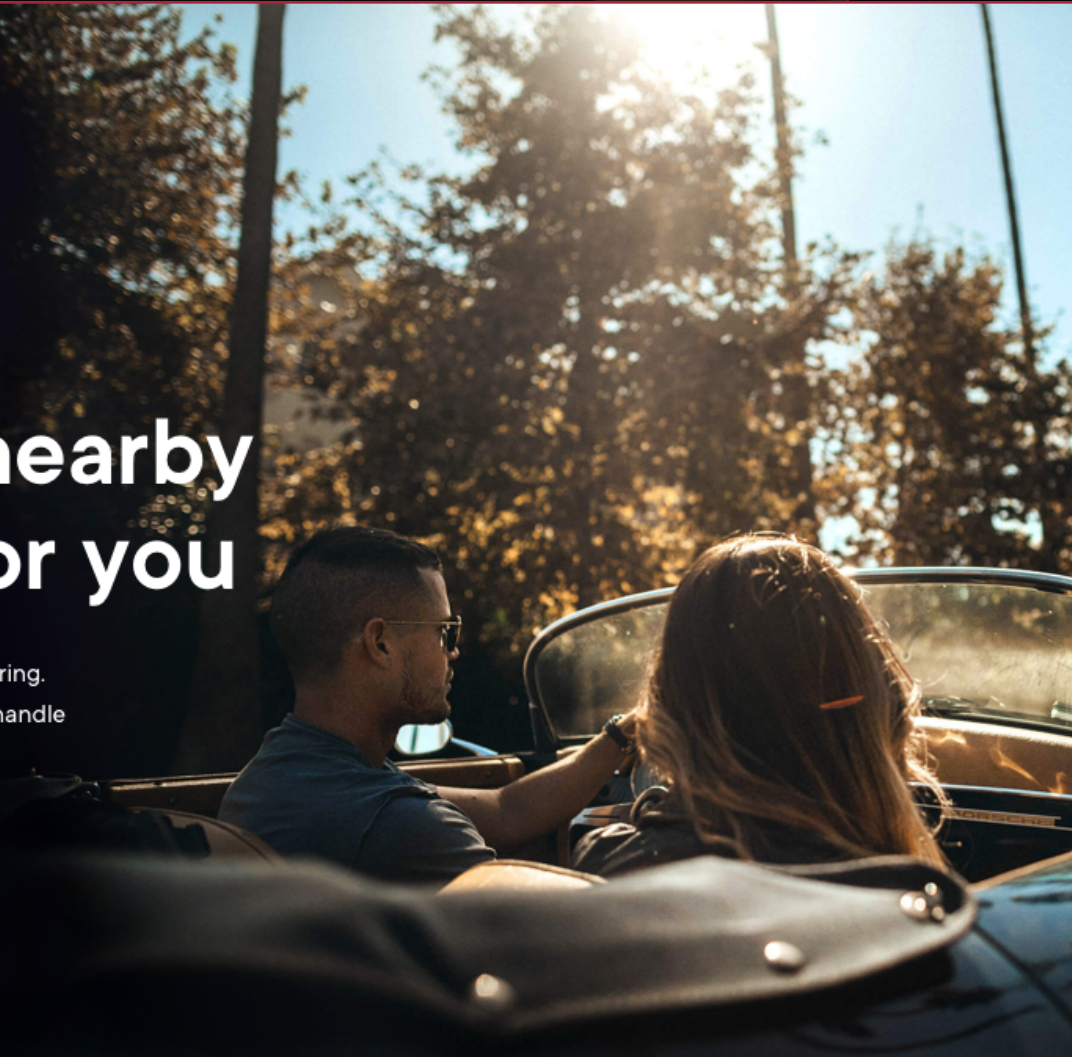

ae|ond°

Someone nearby has a car for you

A fully decentralised peer-to-peer car sharing. No more paperwork, Smart contracts will handle that for you.
